ALIF RAHMAN MAULANA

Backend Developer

Semarang | rahmanalifm21@gmail.com | +62 812-2543-7524 | https://alifrahman.vercel.app/

PROFILE SUMMARY

Fresh graduate in D3 Informatics Engineering (GPA 3.71/4.00) with hands on experience building **REST APIs**, **database driven systems**, and **RAG pipelines**. Proficient in **Python/FastAPI**, **Node.js/NestJS**, and **Laravel,** working across PostgreSQL, Redis, and Qdrant vector databases. Built and deployed a production school management platform serving 100+ daily users. Experienced in JWT authentication, RBAC, Docker based deployment, unit testing, and LLM integration.

EXPERIENCE

Fullstack Developer Intern | KB-TK Permata Ceria Bangsa | September 202 – September 2026

- Developed 10+ modules for the Smart-PCB school management platform: student records, QR-code attendance, tuition monitoring, parent access, and automated reports.
- Designed relational data structures with Supabase/PostgreSQL and implemented role-based access control.
- Integrated Firebase Cloud Messaging and deployed to production for 100+ daily active users.

Web Developer & IT Support Intern | Diskominfo Kota Semarang, Indonesia | June 2025 – December 2025

- Developed backend modules for the KominfoMuda internship management platform with Laravel 12 and PHP 8.2.
- Implemented RESTful API endpoints with request validation, error handling, and relational database queries.
- Performed API testing and debugging with Postman and collaborated through Git.

TECHNICAL SKILLS

- **Backend & APIs:** FastAPI, Laravel, Express.js, Node.js, Uvicorn, RESTful API, Authentication, OAuth2/JWT, RBAC, Webhooks, Rate Limiting, Caching
- **Languages:** Python, PHP, Typescript, SQL, HTML, CSS, JavaScript, React, Next.js, Flutter
- **Databases & Queue:** PostgreSQL, MySQL, Redis, Qdrant, Prisma ORM, SQLAlchemy, Alembic, Supabase, BullMQ, SQL, Relational Database Design
- **AI / ML:** RAG Pipeline, LLM Integration, Embedding Models, Vector Search, Prompt Engineering, LangGraph, Gitlab CI
- **Tools & Cloud:** Docker, Docker Compose, Git, GitHub, Gitlab CI , Postman, pytest, Cloudflare R2, S3, Firebase, Vercel

RELEVANT PROJECTS

ScrapeDesk - Multi-Source Scraping Platform

Technologies: *Next.js 15, TypeScript, Supabase, PostgreSQL, pg-boss, Playwright, Docker Compose*

- Built scraping engine supporting web pages, JSON APIs, RSS feeds, and sitemap crawls behind one interface.
- Implemented cron scheduling, HMAC-SHA256 signed webhooks, retry with exponential backoff, and proxy rotation.
- Shipped public REST API with hashed keys, per-user quotas, and Row Level Security; 78 unit tests in CI.

CurioAI - Enterprise RAG Knowledge Platform

Technologies: *FastAPI, Python, Next.js, PostgreSQL, Qdrant, Redis, MinIO, Docker, pytest, Gemini*

- Built RAG pipeline: document ingestion, chunking, embedding, vector indexing in Qdrant, grounded generation.
- Implemented source citations with document name, page number, and relevance score on every answer.
- Added Redis rate limiting, analytics caching, audit logging, and 31 pytest tests with mypy strict mode.
- Designed JWT auth with refresh tokens, document-level permissions, and RBAC across three roles.

EDUCATION

Diploma (D3) Informatics Engineering| Politeknik Negeri Semarang | August 2023 – September 2026

GPA : 3,71 / 4,00

CERTIFICATION

- **Junior Web Development** — Dicoding Academy 2025
- **Database Design** — Oracle Academy 2024
